Color:	Transparent
Odor:	Lemon
Density 20°C:	1 gr/cm ³
pH:	1
Flash point:	5°C
Freezing point:	3°C

Stored at temperatures from 3°C to 30°C.

DESCRIPTION

The AP-303 is a powerful concentrated cleaner designed for the removal of construction pollutants. It removes the residues of joints and cement, accumulated salts, rust, stains from pets, etc. It facilitates special cleaning agents in order to penetrate and bring to the surface the pollutants. It does not produce noxious fumes for human and the environment, and is safer than other acidic cleaners. It can also be used for the slight corrosion of concrete. Not recommended for surfaces sensitive to acids such as mosaics, colored cements, metalized tiles and polished marbles.

APPLICATION

Read all the instructions carefully before use. Always wear plastic gloves and safety glasses.

Apply the product to a small area and leave it for 24 hours to determine the ease of use and the desired results. Wet the surface with clean water before applying the cleaner. 1. Ceramic tiles: Drip the liquid on the surface, let it act for 2-3 minutes and rub with a sponge or brush. Then rinse with plenty of water. In very tough stains repeat the process. If the joints have been grooved 15 days before, use it at a 1:1 dilution.

INFORMATION ON STORAGE AND HANDLING

If medical advice is needed, have the product container or label at hand. Keep out of reach of children. Wash thoroughly after use. Wear protective gloves/protective clothing/eye protection/face protection. IF SWALLOWED: rinse mouth. Do NOT induce vomiting. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Dispose of contents and / or their container according to the separated collection system used in your municipality.
